PO Box 96456 Washington, D.C. 20070-6456

I demand that the new organic "Rule" be withdrawn. It must be rewritten in strict accordance with the recommendations of the National Organic Standards Board established by the Organic Food Production Act of 1990.

Here is a partial list of the horrors in this "Rule" that I say No to:

No irradiated foods to be labeled Organic, No crops fertilized with municipal sewage sludge to be labeled Organic, No genetically engineered organisms to be used on crops, No synthetic additives beyond the NOSB List, No prohibition of "Green" labeling, No fees for the small organic farmer and processor, No livestock confinement and No excessive drugging of livestock.

I rely on "certified Organic" to mean pure and safe food, and do not want any lowering of the well established organic industry standards.

Thank you,
